

Specification for the migration of legacy data to the Data Futures data model.

Migration.Engagement

Version 0.5.0: Revision history at foot of document

Overview

This document provides the specification for the migration of legacy data into the Data Futures Engagement entity and select sub-entities; Leaver, CollaborativeProvision, EntryProfile, EntryProfile.EntryQualificationAward, EntryProfile.EntryQualificationAward.EntryQualificationSubject, StudentAccreditationAim.

This is one of a series of specifications produced to translate or map legacy data submitted against the CXX051/54 collections into the Data Futures data model (056). The data migration activity will allow quality assurance checks to be run on the first Data Futures collection in 2022/23 for data submitted by providers.

Entities covered in this specification

Entity name	Entity description
Migration.Engagement	Provides information on how data has been migrated into the Engagement entity.
Migration.Engagement.Leaver	Provides information on how data has been migrated into the Leaver sub-entity of Engagement.
Migration.Engagement.CollaborativeProvision	Provides information on how data has been migrated into the CollaborativeProvision sub-entity of Engagement.
Migration.Engagement.EntryProfile	Provides information on how data has been migrated into the EntryProfile sub-entity of Engagement.
Migration.Engagement.EntryProfile.EntryQualificationAward	Provides information on how data has been migrated into the EntryQualificationAward sub-entity of EntryProfile.
Migration.Engagement.EntryProfile.EntryQualificationAward.EntryQualificationSubject	Provides information on how data has been migrated into the EntryQualificationSubject sub-entity of EntryQualificationAward.
Migration.Engagement.StudentAccreditationAim	Provides information on accreditations applicable to the student's Engagement.

Migration.Engagement - This entity represents student Engagements, each Engagement can be identified by a unique combination of student identifier, HE provider identifier and instance identifier.

Migration.Engagement.Leaver - This sub-entity of Engagement represents leaver information for each Engagement. This entity only contains information when the student has left and an end date has been returned.

Migration.Engagement.CollaborativeProvision - This sub-entity of Engagement represents collaborative provision information for each Engagement. When there is no collaborative information, there will be no information in this entity.

Migration.Engagement.EntryProfile - This sub-entity of Engagement represents entry profile information for each Engagement. Entry profile information should be available for all Engagements.

Migration.Engagement.EntryProfile.EntryQualificationAward - This sub-entity of EntryProfile represents entry qualification information for each Engagement.

Migration.Engagement.EntryProfile.EntryQualificationAward.EntryQualificationSubject - This sub-entity of EntryQualificationAward represents entry qualification subject information for each entry qualification.

Migration.Engagement.StudentAccreditationAim – This entity records where the student's Engagement has an accreditation.

These entities are only created for students within the migrated population (see Z_POPMIGRATION), this applies to both the Student record (051) and the Student Alternative record (054).

Additional information

Where there is a record for the same student (based on HUSID) at the same provider (based on UKPRN) in both the latest collection year and the previous collection year, student information has been taken from the latest collection year.

Where labels, codes or granularity differ for a migrated field, a value mapping table is provided following the Field mapping table below.

Please be aware that whilst field labels may be the same for legacy and Data Futures, the coverage may differ. The Data Dictionary within the Data Specification provides full lists of Data Futures valid entries and coverage of the data.

Value mapping tables

For those fields which have been migrated but are not a direct mapping (i.e., labels, codes or granularity differ), tables listing the mapping of the valid values are provided below.

Where appropriate and for completeness, new codes for Data Futures (056) that have no legacy equivalent are still listed but marked with 'N/A' for legacy code and the 1:1 code mapping. Equally, legacy values which have not been mapped are still listed, marked 'Not mapped'.

[1:1 code mapping](#)

1:1 code mapping is 'Y':

There is only **one** legacy code mapped to **one** 056 code. In some cases, the codes will be the same, e.g. Student.SDEPEND in legacy 01 maps to 01 in Migration.Student.STUDEP. In others they are different codes, Student.ETHNIC '22' maps to '120'. Similarly, the labels may remain the same or differ.

Even for 1:1 code mappings, if the label differs substantially between legacy and 056, the migrated data label will account for both labels to avoid any misinterpretation, particularly for personal characteristic fields e.g. if Legacy 99 'Not known' is a 1:1 mapping to 99 'Not available', then the migrated data label may state 'Not available/ Not known'.

As an exception to this, where 'Information refused' is mapped to 'Prefer not to say', the migration label will state only 'Prefer not to say'.

1:1 code mapping is 'N':

This can be a result of legacy codes either being combined in an 056 code, or split across multiple 056 codes depending on additional fields e.g. some ethnicity codes differ by the provider country and so have been mapped to separate 056 codes accordingly.

As with the 1:1 code mappings, if the label differs substantially between Legacy and 056, the migrated data label will account for both labels to avoid any misinterpretation, particularly for personal characteristic fields.

1:1 code mapping is 'N/A':

This notation is used where the code is new for Data Futures (056) and has no legacy equivalent. These codes are only listed for completeness. Although the new codes should not appear in Migrated data, the 056 code and label values are still listed within the Migrated columns and the 056 label column is marked 'New code'.

Revision history

2021-09-27 0.1.0 Mapping for relevant fields updated following the personal characteristics consultation.

2021-10-01 0.1.1 Amendment to CARELEAVER codes. Remove mapping of NULL data in PARED.

2021-11-08 0.1.2 Within field mapping list: APELCRD added; INTENDEDDESTINATION changed position to be listed with other Leaver entity fields. SCN references moved to Student entity Migration specification.

2022-01-04 0.2.0 Code 10 'Postgraduate teaching apprenticeship' added to ENTRYRTE mapping; Code 03 removed from ACCESSPRG; Code 09 'No experience of care' added and label change for 98 'Not available or not known' for CARELEAVER; Code 03 'No response given' added and label change for 98 'Prefer not to say' for PARED; Specification for student Engagement accreditation added. PREVIOUSPROVIDER code for 'Not available' updated from 9998 to 9999.

2022-02-07 0.3.0 New INCOMINGEXCHANGE code 03 added. Restructure of value mapping tables to remove colour coding, additional content to describe new tables. Some Migration labels altered to make more consistent across fields. References to SR and SAR changed to 051 and 054 respectively.

2022-02-23 0.4.0 Legacy fields removed from migration dataset and links to coding manual updated to 21056, 20051 and 20054. Derived fields names updated for Z_PERMADDUC, Z_PERMADDREGION and Z_PERMADD COUNTRY. Invalid Student Accreditation identifiers removed from the list of new codes. Code 13911 in Student Accreditation marked as 'N' for 1:1 mapping and label updated to reflect the combination of legacy codes. Mapping for RCSTDNT added.

2022-07-08 0.4.1 Duplicate value 03 in PARED removed, mapping corrected for PARED so that 7 'No response given' maps to 03 'No response given', and 99 'Not available' marked as new code.

2022-07-19 0.5.0 Introduction text updated to highlight that migrated data supplied in the HESA data platform will on a per entity basis and not combined. Hyperlink and reference to coding manual removed under 'Additional information'. EntryQualificationAward and EntryQualificationSubject entities added. PERMADDCOUNTRY mapping updated to indicate it's a 1-1 mapping except for the 'Not known' code ZZ mapping to 97. Classification of degree moved to 13Migration.Qualification.docx. Derived fields removed from migrated data description. DF field update: DEPENDANT to ENTPRODEP; c to STUACCID, QUALRESULT to ENTRYQUALAWARDRESULT.
